CAPSTONE 03 · AUTOMATION SUITE

Automate a slice of your real week, and leave it running.

A Cowork task that works on your files, a Skill that keeps the output consistent, and a scheduled brief that runs on its own. Run it for three cycles, then improve it.

YOU SUBMIT	MODULES	TIME	YOU KEEP
A write-up with every cycle's output	4.6 Cowork · 2.6 Skills · 5.2 Schedules	About five hours, plus three cycles	A brief that arrives unasked

WHAT YOU BUILD

MODULE 4.6

One Cowork task

Claude works in a folder you grant and saves the result back.

MINIMUM

- Real files, not samples
- Output saved back to the folder

MODULE 2.6

One Skill

The format the automation leans on, so outputs stay consistent.

MINIMUM

- Named in the scheduled prompt
- Tested before it is scheduled

MODULE 5.2

One scheduled brief

A recurring task whose prompt needs no chat history.

MINIMUM

- Self-contained prompt
- Runs for at least three cycles

HOW THE THREE PIECES CONNECT

Cowork prepares

Turns messy inputs into a clean, predictable file the brief can read.

The Skill shapes

Fixes the sections, length and voice of every brief.

The schedule repeats

Runs the brief on a cadence, using both, without you asking.

If you removed any one piece, the other two should get worse. That is what connected means.

WHAT YOU SUBMIT

The write-up

2-3 PAGES

- The three pieces and how they connect
- The scheduled prompt, in full
- What you refined after cycle one, and why

The cycle outputs

THREE OR MORE

- Every cycle's output, unedited
- One line per cycle: on time, right, useful

HOW IT IS ASSESSED

CRITERION	WEIGHT
All three pieces built and working	20
The pieces genuinely connect	20
The prompt is self-contained	20
Three real cycles shown	20
Refined after the first run	20

GROUND RULES

- Give Cowork a dedicated folder, never your whole home folder.
- Keep approvals on until you trust what the task does.
- Remove client names and confidential figures from the outputs.
