CAPSTONE 05 · VISUAL SHOWCASE

Show the range of what Claude can make, in one demo.

Build a dashboard Artifact from real data, a Claude Design piece and one cool trick, then combine them into a single walkthrough that someone could follow without you in the room.

YOU SUBMIT	MODULES	TIME	YOU KEEP
A walkthrough doc and the HTML	3.2 Artifacts · 3.3 Design · 3.5, 7.8	About six hours	A demo you can reuse

WHAT YOU BUILD

MODULE 3.2

A dashboard Artifact

Your real data on one screen: the few numbers that matter, and the charts that explain them.

MINIMUM

- Real data, source named
- Key numbers checked by hand

MODULE 3.3

A Claude Design piece

A deck, mockup or one-pager made in Claude Design and finished to the point you would send it.

MINIMUM

- Made in Claude Design
- Exported, or shared as a link

MODULES 3.5, 7.8

One cool trick

Taken from the bonus round or the thinking-partner list, shown working rather than described.

MINIMUM

- Shown live or step by step
- Why it is useful, in one line

ONE WALKTHROUGH, NOT THREE EXHIBITS

One story

Pick one question your audience cares about. Every piece answers part of it.

Steps anyone can repeat

Numbered steps, the exact prompts, and what to expect.

Proof on the page

Screenshots, links and files, so nothing depends on you.

The test: a newcomer follows your walkthrough alone and ends up with the same three things.

WHAT YOU SUBMIT

The walkthrough doc

4-8 PAGES

- The story, and what the reader will make
- Each piece: prompt, screenshot, link
- A 'try it yourself' section with prompts

The HTML

ONE FILE OR LINK

- The dashboard, exported as HTML
- Or one HTML page that walks through all three

HOW IT IS ASSESSED

CRITERION	WEIGHT
Dashboard is real and correct	25
Design piece is finished	20
The trick is genuinely useful	15
Followable without you	25
The pieces tell one story	15

GROUND RULES

— Real data, with personal details removed.

— Only show a trick you can reproduce on demand.

— Credit any template or outside asset you used.
